DETAILED ACTION

Election/Restrictions

1. Applicant's election of group I (claims 1-4 and 9-21) in the reply filed on 7/7/2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 5-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/7/2008.

Claim Objections

3. Claims 4 and 9-21 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by JP'610 (JP 5-186610 as cited in the IDS see attached translation).

As to claim 1, JP'610 teaches a filler sheet for a solar cell module, which is formed as a filler sheet laminated on front face and rear face sides of a solar cell element and is made of a resin film produced by a resin composition comprising:

- A copolymer of an α -olefin and an ethylenic unsaturated silane compound ([0011], [0018] and [0032])
- and one or more selected from a group consisting of a light resisting agent, an ultraviolet absorbent and a thermal stabilizer ([0033]).

Regarding claim 2, JP'610 teaches that the α -olefin is one or more selected from a group consisting of ethylene, propylene, 1-butene, isobutylene, 1-pentene, 2-methyl-1-butene, 3-methyl-1-butene, 1-hexene, 1-heptene, 1-octene, 1-nonene, and 1-decene ([0032]).

Regarding claim 3, JP'610 teaches that the ethylenic unsaturated silane compound is one or more selected from the group consisting of vinyltrimethoxysilane ([0018]).
